57- Wow, that's way different than what we suggested. It's on the east side of Main St instead of the west side. If Pole 2107, east of Pine is not acceptable, then we'll use your suggested location, likely pole 900 and changed the name to "EB Main east of Town Center East"
83-Your suggested location, likely pole 724, is approved.
85- Your suggested location, likely pole 117, is approved. Suggest name change to "NB Broadway south of Harding"
87- Your suggested location, likely pole 35, is approved
88- Another big move. Would prefer closer to Alvin. If pole 100 on the south west corner of N. Broadway and W. Rose is not a viable alternative, then your suggested location, likely pole 112, is approved with the name change "SB Broadway south of Orchard"
90- Not acceptable. Want this camera North of Main St. Is pole 66 on the south west corner of N. Broadway and Chapel not a viable option? Your suggested location south of Main, likely pole 1049 does not work for me.
92- Not acceptable. You've moved it to Ocotillo/Larkspur. The current cal-trans rule is putting a kink in my coverage plan for S. Broadway. Suggest pole 6879 just north of St. Andrews. Rename "SB Broadway north of Santa Maria Way" (Also we're likely not going to be able to move current Flock camera #13 NB Hwy 135 @ Santa Maria Way, so be sure to make note of that)

With the new plan to use existing poles, my “move” request for “#13 NB Hwy 135 @ Santa Maria Way (Pole 3678)” probably cannot be done. So you may leave it in its currently planned location.

Call me if you want to discuss my comments. Thanks

Hello all,

I have reviewed these 7 locations (57, 83, 85, 87, 88, 90, 92) and have placed them all on the nearest available light poles that would be viable. For a few I needed to go a little further from the previous location due to trees obstructing solar, signage, and other reasons. See changes in Deployment Plan here. Happy to discuss on a call if necessary.

Jason Carrasquillo

Hello everyone,
Our permitting team has been working with Caltrans and we have some feedback. They have given us two options and I wanted to run it through you all first. Do you have a preference, either one one you pick will involve having to remap some locations.

> They have settled on two options that provide the easiest ways to accomplish our project. Both of these solutions will satisfy the Highway Design Manual. These are going to be the options for both projects on Hwy 135 and Hwy 166.

1. Put cameras on city owned light standards (street lights)
    a. This would eliminate the need for a new fixed object and is allowable because our encroachment permits manual has changed since the last submittal.

2. Place fixed poles (not break-away) in locations where the speed limit is less than 35 mph and meets the requirements of section 309.1(2)(a) of the Caltrans Highway Design Manual, which I have attached for reference.

The map is fully updated!

@Veronica Cooley will reach out to the contact for Public works as well to get a head start on making sure all is good on that front.
We have the Caltrans permits already started so we can get those submitted as soon as possible.

> WB Donovan east of College...what can we do to try and catch WB traffic coming off freeway prior to turning onto college?
> EB Betteravia near Bradley
> NB Bradley south of Betteravia.... Latest suggested pole 4670 too far north. Don't need to cover the right turn lanes (Flock "EB Betteravia near Bradley" should catch that)
> NB Broadway north of Battles... I think we'd like Lane 1 and 2 coverage if possible so a free standing pole in center median if possible? We are flexible on this one
> SB Western north of Alvin.... Consider even further north. Oakley park 1300 N. Western covering SB traffic?
> WB Main west of vine....current proposed location seems to have changed to Central Plaza park. Is that best? Nothing between McClelland and Miller? (road too wide?)
> NB Lincoln south of Battles....don't want to move camera too far south. Want to be sure to catch all NB leaving area. What other options?

NB PIne south of Jones.... still under review..no photo attached with most recent suggestion.

As I'm finishing up today's review, it dawns on me, I could be making my comments into your cool web based "Deployment Manager". Why am I putting the comments into my spread sheet and attaching it? (Sorry about that)
Let me know if you want me to add my comments to the "Deployment Manager"

Spread sheet attached.
